Office Action Summary

Art Unit:

Claims 1-30 are presented for examination.

The amendments and remarks filed on February 22, 1999 have been received and entered.

Claims 1-30 are rejected under 35 U.S.C. 103 as being unpatentable over Hazariwala et al.  
And Fechner.

Hazariwala et al. Teach the use of 2% hydroxypropylmethyl cellulose as a safe viscoelastic material used during cataract surgery. Fechner teaches a process for preparing the 2% hydroxypropylmethyl cellulose of dissolving, filtering and autoclaving.

One skilled in the art would have been motivated to combine the teachings of the above references, since they in combination relate to a safe composition of hydroxypropylmethyl cellulose in ophthalmic surgery and also a process for preparing such composition. Applicant has presented no evidence to establish the unexpected or unobvious nature of the claimed invention, and as such, claims 1-30 are properly rejected under 35 U.S.C. 103.
